# Ako získa Mendeley?

Krok 1:  
Zaregistrujte sa na **Mendeley**  
online

The screenshot shows the Mendeley registration page. At the top left is the Mendeley logo. Below it, the text 'Create a free account' is displayed, with a link 'Already on Mendeley? Sign in' to its right. The registration form contains four input fields: 'First name', 'Last name', 'E-mail', and 'Password'. Below these fields is a green 'Get started' button. Underneath the form, there is a section for social media sign-up with the text 'or sign up with Facebook' and a blue 'Connect with Facebook' button.

Krok 2:  
Download **Mendeley Desktop**

**Mendeley Desktop for Mac OS X**

Version 1.11 for Mac OS X 10.6+

Your download should start automatically in a few seconds.

If it doesn't, [restart the download](#).

[Need a different version?](#)

Krok 3:  
Budujte Vazu kni0nicu

Referen ný mana0er

# Referen ný mana0er - Mendeley Desktop

The screenshot displays the Mendeley Desktop application window. The interface is divided into several sections:

- Top Bar:** Contains icons for Documents, Folders, Related, and Sync, along with a search bar.
- Left Sidebar:**
  - MENDELEY:** Literature Search, Mendeley Suggest.
  - MY LIBRARY:** All Documents (selected), Recently Added, Favorites, Needs Review, My Publications, Unsorted, The Lancet, Create Folder...
  - GROUPS:** Create Group...
  - Filter by My Tags:** All, mendeley.
- Main Document List:** A table with columns: Authors, Title, Year, Published In.

| Authors          | Title   | Year | Published In             |

The screenshot shows a web browser window with a Google Scholar search for 'Mendeley'. The search results are displayed on the left, and a Mendeley import overlay is shown on the right. The overlay displays '10 articles found' and a 'Save all' button. The first article listed is 'Mendeley-A Last. fm For Research?' by Henning, V; Reichelt, J (2008). The second article is 'Generic assignments, strain histories and properties of pure cultures of cyanobacteria' by Rippka, R; Deruelles, J (1979). The third article is 'International Union of Pharmacology classification of receptors for 5-hydroxytryptamine (Serotonin)' by Hoyer, D; Clarke, DE; Fozard, JR (1994). The fourth article is 'The membrane actions of anesthetics and tranquilizers' by Seeman, P (1972). A grey arrow points to the 'Save to Mendeley' button in the browser's address bar.

# Scopus and Science Direct

The screenshot shows the ScienceDirect search results interface. At the top, there is a search bar with the text "open access" and several filter boxes for "Author name", "Journal or book title", "Volume", "Issue", and "Page". A search icon and "Advanced search" link are also present. Below the search bar, a green banner indicates "440,137 articles found for: ALL(open access)" and provides options to "See image results", "Save this search", "Save as search alert", and "RSS Feed".

The main results area shows a list of articles. The first article is "4 - Open access eBook Social Reading, 2013, F José-Antonio Cordon-G". The second article is "7 - Looking ahead to Demystifying the Institut Marianne A. Buehler" and is selected with a checkmark. The third article is "1 - Transcending tradit Demystifying the Institut Marianne A. Buehler". The fourth article is "Observations and Perc".

An "Export" dialog box is open over the second article, displaying the following options:

- You have selected 1 citation for export.**
- Direct export**
  - Save to Mendeley (with "About Mendeley" link)
  - Save to RefWorks (with "About RefWorks" link)
- Export file**
  - RIS (for EndNote, Reference Manager, ProCite)
  - BibTeX
  - Text
- Export

On the left side of the results page, there are two panels: "Search within results" with a search input and "Refine results" with "Limit to" and "Exclude" buttons. Below "Refine results" is a "Publication" section with checkboxes for "Journal (385,750)", "Book (64,979)", and "Reference Work (6,033)". Below that is a "Journal/Book Title" section with checkboxes for "The Lancet (5,727)" and "Social Science & Medicine (3,278)".

At the bottom right of the page, there is a decorative graphic of a molecular structure.

## Why Full Open Access Matters

**Michael W. Carroll\***  
 American University, Washington, D.C., United States of America

Scientific authors who pay to publish their articles in an open-access publication should be congratulated for doing so. They also should be aware that they may not be getting full open access from some publications that charge for publication under the "open access" label. Two features define an open-access publication: (1) the published contents are freely accessible through the Internet, and (2) readers are given copyright permission (see Box 1) to republish or reuse the content as they like so long as the author and publisher receive proper attribution [1]. Recently, some publications have begun offering an open-access option that charges for Internet publication without granting readers full reuse rights, such as Springer's Open Choice or Nature's Scientific Reports. These publishers have adopted a business model through which authors pay for immediate publication on the Internet but the publisher nonetheless keeps commercial reuse rights for itself. This is not full open access (see Box 2).

Getting open access right matters because the new publishing model is designed to increase the pace and impact of scientific communication through the power of the Internet. Immediate, free publication increases the audience for scientific research and overcomes the increasingly high price barrier to access imposed by the traditional, is to shift from a model that uses copyright to control reuse of content to one that uses copyright to encourage republication, preservation, and translation.

**Why Support the Open-Access Financial Model?**

Pricing of traditional, subscription-financed scientific journals is highly inefficient. The growth in digital technologies and in digital networks should be driving down the price of access to the scholarly journal literature, but instead prices have increased at a rate greatly in excess of inflation (e.g., [4,5]). Moreover, studies from journal publishing in some disciplines show that commercial journal publishers successfully charge significantly more than non-commercial journal publishers, such as scholarly societies, even when the commercial offerings make less valuable contributions to the progress of science and knowledge as measured by citations (e.g., [6]).

The economic roots of the pricing problem are not difficult to discern. Journal publishers provide a platform between authors of journal articles and their readers. In these situations, the go-between can choose a mix of prices to each side of the relationship, usually charging more to the party that is more dependent on the go-between. The tradi-

their demand is relatively inelastic for two reasons. First, libraries are mission-driven to acquire as broad a swath of the literature as they can afford to serve their patrons effectively. Second, subscriptions for academic journals within a given field are not readily interchangeable, unlike, say, subscriptions to news magazines, because each academic journal publishes unique research. Having their subscribers over a barrel, commercial publishers have steadily consolidated to reduce their costs while increasing profits through uncompetitive pricing [7].

The open-access model fundamentally shifts the balance of power in journal publishing, and thereby greatly enhances the efficiency and efficacy of scientific communication. In its most common form, the model shifts the costs of publication entirely to the author-funder side of the relationship so as to broaden access as far as the Internet reaches and to remove the need for any lingering usage barriers. By shifting the costs of publication entirely to the author-funder side, journals must compete head-to-head on quality and price without diminishing impact through price or usage barriers because authors have greater choice over where to publish than libraries have over whether to subscribe. This increased competition will reduce the overall costs

# Vlastná anotácia

The screenshot shows the Mendeley Desktop application window. The title bar reads "Mendeley Desktop". The menu bar includes "Pan", "Highlight", "Note", "Select", "Copy", "Paste", "Rotate", "Zoom", "Fullscreen", and "Sync". The main window is divided into two panes. The left pane shows a PDF document titled "Open Access Publishing Authors Want" by Rajiv Nariani and Leila Fernand. A yellow sticky note is overlaid on the document, containing the text: "You 12/03/2014 16:08 This sticky note allows you to annotate your paper. You can also make notes to the right." The right pane is titled "Details" and has tabs for "Notes", "Contents", and "Enrichments". The "Notes" tab is active, showing a text area with a large upward-pointing arrow. Below the notes area is an "Annotations" section with the text: "This paper has no annotations yet. You can add notes and highlights in the PDF viewer." A decorative graphic of hexagons is visible in the bottom right corner of the screenshot.

The screenshot shows the Mendeley Desktop application window. The title bar reads 'Mendeley Desktop'. Below the title bar are icons for Documents, Folders, Related, and Sync. The main interface is divided into several sections:

- Left sidebar:** Contains 'MENDELEY' (Literature Search, Mendeley Suggest), 'MY LIBRARY' (All Documents, Recently Added, Favorites, Needs Review, My Publications, Unsorted, The Lancet, Create Folder...), and 'GROUPS' (Create Group...). Below this is a 'Filter by Authors' dropdown menu with a list of authors including Andrews, J.G., Aycock, Mary, Bailey, Charles W., Benson, Philippa J., Björk, Bo Christer, Brody, Tim, Carr, Les, Carroll, Michael W., Chandrasekhar, V., Collins, Maria, Cryer, Emma, and Evans, James A.
- Center pane:** Titled 'Literature Search', it shows a search box with 'Open Access' entered. Below the search box is a list of search results. The selected result is 'Why full open access matters' by Michael W. Carroll, 2011, from PLoS Biology. Other results include 'Open Access and Libraries', 'When is open access not open access?', 'The open access advantage.', 'Incorporating Open Access into Libraries', 'Open Access Publishing: What Authors Want', 'The Inevitability of Open Access', 'Open Access Overview', 'What is Open Access?(Open Access)', 'Open Access Must Enable Open Use', 'Biodiversity conservation demands open access', and 'Open access and global participation in science'.
- Right pane:** Titled 'Details', it shows a message 'This document is not in your library' with a 'Save PDF' button. Below this, it displays the document's metadata: Type: Generic, Authors: M. Carroll, Year: 2011, Pages: (blank), and an abstract: 'This perspective explains the mechanics of copyright and scholarly publishing and warns authors who support open-access publishing about a new pseudo open-access publishing model in which authors pay but publishers still retain commercial reuse rights.' There are also sections for Tags, Author Keywords, and City.

**How To Choose a Good Scientific Problem**  
Uri Alon in *Molecular Cell* (2009)  
Choosing good problems is essential for being a good scientist. But what is a good problem, and how do you choose one? The subject is not usually discussed explicitly within our profession. Scientists are expected to be smart enough to figure it out...

• **Mendeley Year in Review 2013**

This was a year of great change at Mendeley, with lots of news, exciting developments and, of course, tons of fun at Mendeley HQ. Here are a few of the many highlights.

In January, the Mendeley founders Jan, Paul, and Victor were voted "Best Startup Founders" at the Europas, considered the Oscars of the European Tech scene. This was the second win for Mendeley, which scooped up the prize for "Best Social Innovation Which Benefits Society" in 2009.

In February, we listened to your comments and released Mendeley Desktop v1.8, with expanded offerings and bug fixes.

April brought a lot of attention as Mendeley joined Elsevier. We're proud to have honoured our promise that the merger would mean very little change for our users, beyond some positive resources...like the doubling of storage space that immediately followed the announcement.
