5FP

Juraj Furdik, Viera Joklova, Monika Smiralová: „LUDA – Large Urban Distressed Areas“ – Research participants of Bratislava Rača additional staff. 5th FP project (2003-2006) in the research field : "Energies, environment and sustainable development". LUDA is the research project of action 4 : „City of tomorrow and cultural heritage“. LUDA seeks to meet this challenge by providing tools and methods for a more strategic approach towards urban rehabilitation, and by supporting cities in initiating and managing such an approach in its early stages. The goal of the project is to contribute to improvement of quality of life in large urban distressed areas by providing a systematic strategic planning and development approach with special consideration of the take-off phase of rehabilitation processes.
